Graphical Objects and User Interface Components

WCAG AA: **Pass**

Text Input

Explanation

Enter a foreground and background color in RGB hexadecimal format (e.g., #FD3 or #F7DA39) or choose a color using the color picker. The Lightness slider can be used to adjust the selected color.

[WCAG 2](#) level AA requires a contrast ratio of at least 4.5:1 for normal text and 3:1 for large text, and a contrast ratio of at least 3:1 for graphics and user interface components (such as form input borders). Level AAA requires a contrast ratio of at least 7:1 for normal text and 4.5:1 for large text.

Large text is defined as 14 point (typically 18.66px) and bold or larger, or 18 point (typically 24px) or larger.

Hint: [Colorzilla](#) is an excellent tool for extracting the color value from any page element. Additionally, [WAVE](#) can analyze contrast ratios for all page text elements at once.

Use [our link contrast checker](#) to evaluate links that are identified using color alone.

This tool also functions as a basic API. Simply append `&api` to any [permalink](#) to get a JSON object with the contrast ratio and the AA/AAA pass/fail states. For example:
<https://webaim.org/resources/contrastchecker/?fcolor=000000&bcolor=F1B81C&api>.
